

# NEW YORK POST

October 31, 2013

With six bedrooms, 5½ bathrooms and just over 4,000 square feet of space, this “pristine” condo on East 77th Street, off Second Avenue, offers “open skyline views” and “dazzling light” through oversized windows in every room. The centerpiece — well, technically it’s the northwest corner — is the great room: a combined family room, living room and dining room (with enough space for 20 guests). There’s also a custom-designed kitchen, renovated en-suite bathrooms and a master suite with a separate sitting area/office space and a “huge” walk-in closet.
