In the News: Marble House

[The Wall Street Journal](#) details the convoluted back story of the American Express Carriage House (60 Collister) and, in particular, the three-story “Marble House” condo inside it. (It was created by [Stuart Parr](#).) Floor-to-ceiling marble really flips my switch, although maybe it’s just a bit too much like a mausoleum? Anyway, the project is another Tribeca notch on the belt of VE Equities, the developers who are also behind 471 Washington, 1 N. Moore, and 11 N. Moore (a.k.a. 20-24 Varick).
